Dear Someone,

We are Tala & Anastasia. We are in the 4th grade and we live here in Yuma AZ. We like Yuma cause, there are a bunch of farms that give us a food source. Since there are farms there are many water sources, such as canals, lakes, and rivers like the Colorado River. Another reason why we like Yuma is the weather, Its Partly humid and Hot. Sincerely - Tala & Anastasia !!❤

Dear Friends from Colorado,
On a normal day in Yuma Arizona, we use
the Colorado river in many different ways.
Some examples are: drinking water, baths, fill
up pools, and washing our hands.

From,
Ana and Maggie

Dear Student

I will use less water during Shower. We use water to water our crops and to flush the toilet. On a normal day in Yuma Arizona, we use the Colorado River in many different ways.

- Signed: Meyra, and Cayden

Grappler

dear friend

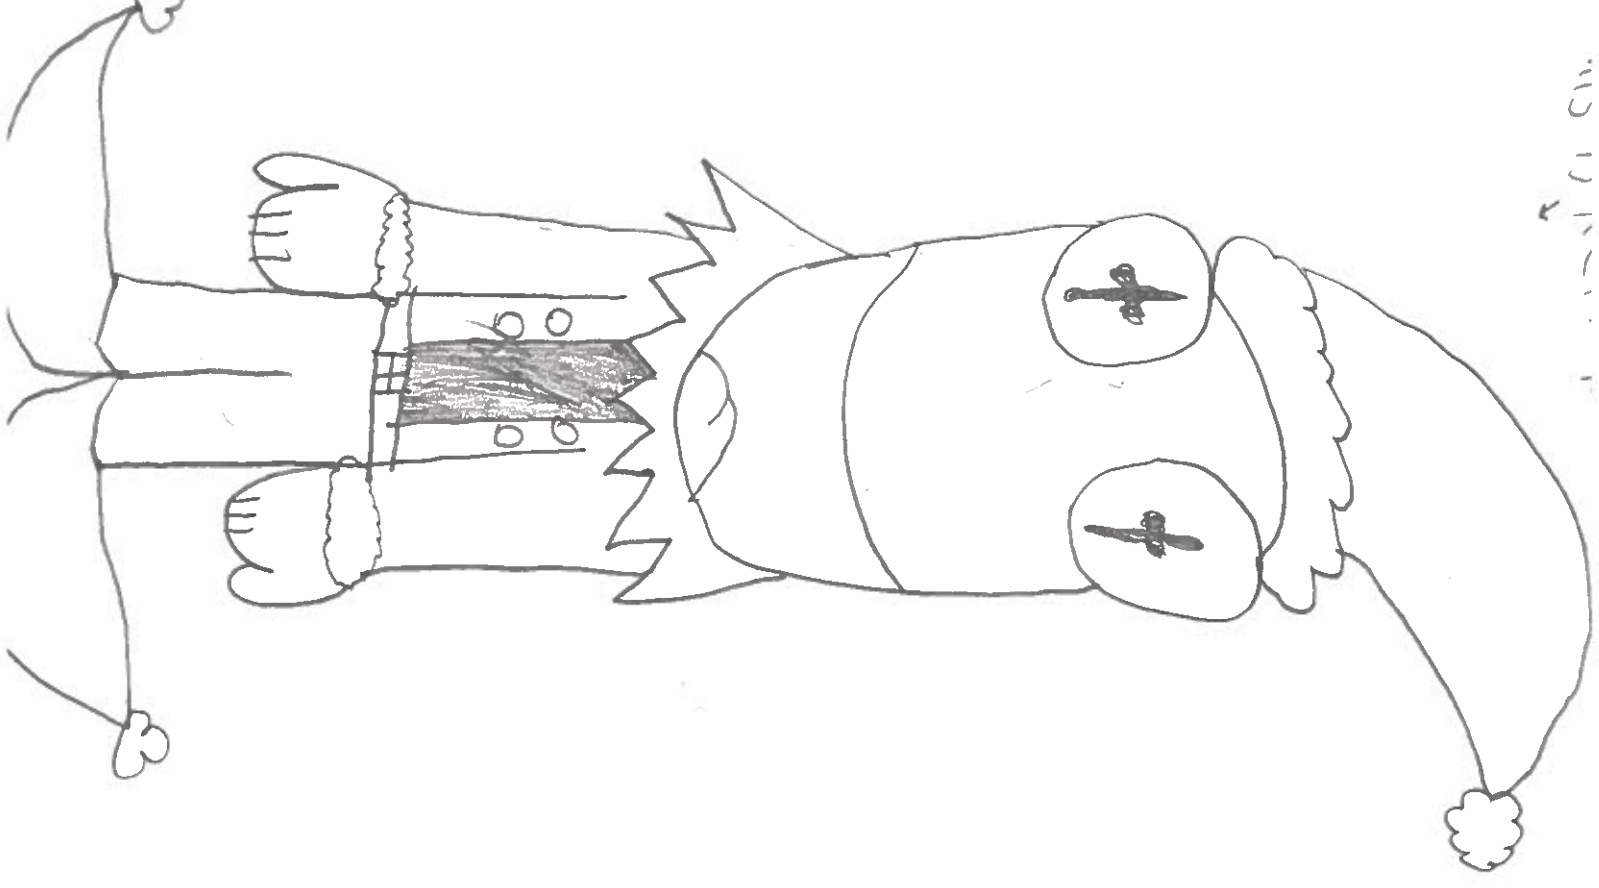

our names are Teagan van horn
and miles. We live in Yuma where
rafting down rivers and swimming. It
is very hot ^{Colorado} river that's why we swim
in Yuma

Hello my name is Aidah i am 11 years old. I live in Yuma Arizona, and the weather, here is dry most of the time and in the winter, it is very cold no snow but it is cold, the lowest degree is 47° and i would like to talk about ways i can save water so, a way that i will save water, is by taking shorter showers and not leave the sink on while i am washing dishes i will also not waste the drinking water or the hose water such as spraying myself or family members, or wasting it on a pool or using it on water balloons just so you could throw them at people yes it may be fun but it is a waste of water, or testing it with stuff. i will also not waste water by using it to clean messes you could also not waste water for chatters like, when you have water in your mouth and someone has to make you laugh or you spit it all out it is a waste.

Sincerely Aidah.
